The Arlington Free Clinic provides medical treatment to low-income adults without health insurance. Treats known emergency, acute, and chronic primary health problems. Offers pharmaceuticals, laboratory, and X-ray. Staffed by volunteer professionals.

General medical appointments for adults with acute and chronic illnesses need routing medical supervision and medications, including diseases such as hypertension, diabetes, and hypothyroidism.

Women's Health includes regular screening and follows up appointments.

Mental health patients will have access to counselors or psychiatrists by referral from Arlington Free Clinic (AFC) physicians.

The in-house pharmacy provides prescriptions written by AFC physicians.

There are no emergency or walk-in medical services.

Service Area(s)
Arlington County
