Center for Behavioral Change offers The Compulsive Eater's Program. This program deals with the range of eating disorders, including anorexia, bulimia, binge eating disorder, as well as providing treatment for bariatric surgery patients. Treatment is directed toward helping patients to regain healthy control of their eating, to manage feelings leading to the bingeing, purging or starving and to develop new coping mechanisms.

A specific program has been developed for weight loss surgery patients who need to normalize their eating prior to surgery or are dealing with eating/emotional issues as a result of their surgery. Pre-and post-surgery therapy sessions are available.
