The Indoor Plumbing Rehabilitation (IPR) program provides zero percent interest, forgivable loans for the installation of indoor plumbing to owners of substandard housing where indoor plumbing does not exist, or where the existing waste disposal systems have failed.

The program also provides for the general rehabilitation of these units and for accessibility improvements to units occupied by persons with disabilities or where overcrowded conditions exist. Annual project activities include outreach, application intake, beneficiary and property eligibility determination and construction management.

The Virginia Department of Housing and Community Development (DHCD) contracts with local governments, nonprofit housing providers and housing authorities to administer the IRP program.

This program is only available when work is being done in that city or county. Call for information.

Service Area(s)
