The Partial Hospitalization Program includes therapy, education, and medication management. The goals of treatment are different for each patient. The length of treatment also varies, but most importantly, the program is designed to meet individual needs.

Patients receive services during the day and go home in the afternoon. This decreases the need for an inpatient hospitalization. The program can also be used as a transitional step between inpatient and outpatient programs.

Treatment services may include one or all of the following: Group Therapy, Therapeutic Activity, Psycho-Education, Medication Management, Special Focus Groups, Individual Therapy, or Family Therapy.

If you or someone you know needs help, call between the hours of 9:00am and 4:30pm, Monday through Friday, to schedule a free assessment. A nurse or therapist will talk with you and help you determine the best treatment services to meet your needs. A physician, counselor, clergy, or family member can also call to refer a patient to the program.
