Paredes Institute for Women's Imaging offers digital mammography (breast cancer screening). Mammography is an important preventive health procedure for women. For early detection of breast cancer, the best option is regular screening mammograms for women over the age of 40. Provides breast health education. Breast MRI available if needed.

Clinical services are oriented to the detection and diagnosis of disease in women, and these include mammography, ultrasound, bone density, and breast biopsy. Male patients are seen as well for evaluation of breast abnormalities.

Service Area(s)
