The Traumatic Brain Injury (TBI) Recovery Support program (RSP) ensures that clients are supported and connected (and stay connected) to appropriate resources as they progress through the entire continuum of care to recovery.

The TBI Recovery Support Program (formerly known as the Regional Care Coordination Program) provides medical and non medical services and resources to service members and veterans who have sustained a TBI, as well as family members and caregivers.

Recovery support specialists counsel with client by phone or in person about issues they are having in treatment, other medical or psychological health conditions, strengths and limitations, family issues, changes in duty status and other relevant issues.

Service Area(s)

Statewide
